

The Fibertop Wifibox is designed to easily deploy Ruckus ZoneFlex access points on street cabinets. It offers cable operators a solid solution to extend their network and turn cable into WiFi Hotspots.

## Benefits:

- Made of nylon and fiber to maintain optimal WiFi signal
- Designed to fit Ruckus access points
- Quick and easy to mount on street cabinets
- Solid design to resist vandalism, theft and extreme weather
- Ventilates to cool down equipment
- Could be custom made for specific situations
- Available in multiple colours
